

# Panamic Carbon Fibre Booms

Renowned throughout the world as The Industry Standard

## Suspensions

Lightweight dense plastic suspension design with low handling noise properties, Delryn mic clips suspended in "O" rings ensures the mic is always centred. The design is so versatile that only two sizes of sliding cradles are needed for a complete range of microphones. Fully compatible with Rycote windgags.

Elegantly crafted to the high standard we have come to expect from Panamic, the boom pole leaders in the sound industry.

Panamic boom poles are manufactured from the highest quality carbon fibre, are lightweight, have superb balance and come with a wear resistant nylon web handle. They have silent operating nylon bushes and precision locking rings. All parts are replaceable.

## Panamic boom poles are supplied in ten different sizes

<b>Mini</b>	3 Section	<i>Quick Release Tip</i>	0.73 – 1.83 metre
	4 Section	<i>Quick Release Tip</i>	0.73 – 2.25 metre
